

Progressive Project

You will have until **Friday** (We will present on Friday) to create a product that will teach the class your topic. It can be a video or it can be a prezi, or anywhere in between, but it must be informational. You will have approximately 20 minutes each day to work on your projects. **You will present on FRIDAY.** You will be teaching your section, be prepared to answer questions. In addition to your presentation, you will create a poster using a program of your choosing (PiktoChart is the simplest, in my opinion) or you may make it on poster board.

Your poster must include:

- Title (10 points)
- Each term represented (10 points)
- Each term defined (20 points)
- Images - At least one per term (10 points)

RECAP: You are making a presentation AND poster. The poster is half your grade and the presentation is the other half. The presentation can be a video or a powerpoint, whatever you choose.

Remember, with progressivism, there must first be a **problem**, a **solution**, and then the **effects** of that solution. Be sure to include the whole story of the goal.

Resource you may like use:

Discovery Ed -- CHOCK full of videos and resources. If you can include a video in your presentation, that is always a bonus!

Possible formats:

iMovie/iMovie Trailer

Prezi

iBook

Easel.Ly

ToonDoo

StoryBird

InstaGrok

Glogster

Pen.io

SlideShare
